

The Lead-out Energy Flying Saucer Paradigm

Prof. Dennis Leung, Lawrence Tseung
William Fung, Peter Chan, T S Lau, Holly
Use Lee-Tseung Lead out Energy Theory

lawrencetseung@yahoo.com

Presentation on Dec 31, 2015

Continued: Overunity.com - search “ufo propu”

Goal 1

- Many UFO sightings. Find a **plausible** scientific explanation. Can they be man-made?
- Can we use energy from the environment such as gravity, light, magnetic, electromagnetic or electron cloud energy from atoms?
- Over 60 QMOGENs claimed. US Patent granted, 225 HP Pulse Motor funded by Hong Kong, Tsinghua has Energy Multiplier.
- Is there a **scientific explanation**?

Goal 2

- China and USA are keeping the UFO technology as top military secret.
- Preach Love Thy Enemy to set the groundwork for spreading prosperity to all Nations.
- Preach Modern Wealth as the quality and quantity of Meaningful Economic Activities.
- Use Mutual Credits and Special Economic Zones etc to overcome need to become lowest cost provider.

Obstacle to Overcome 1

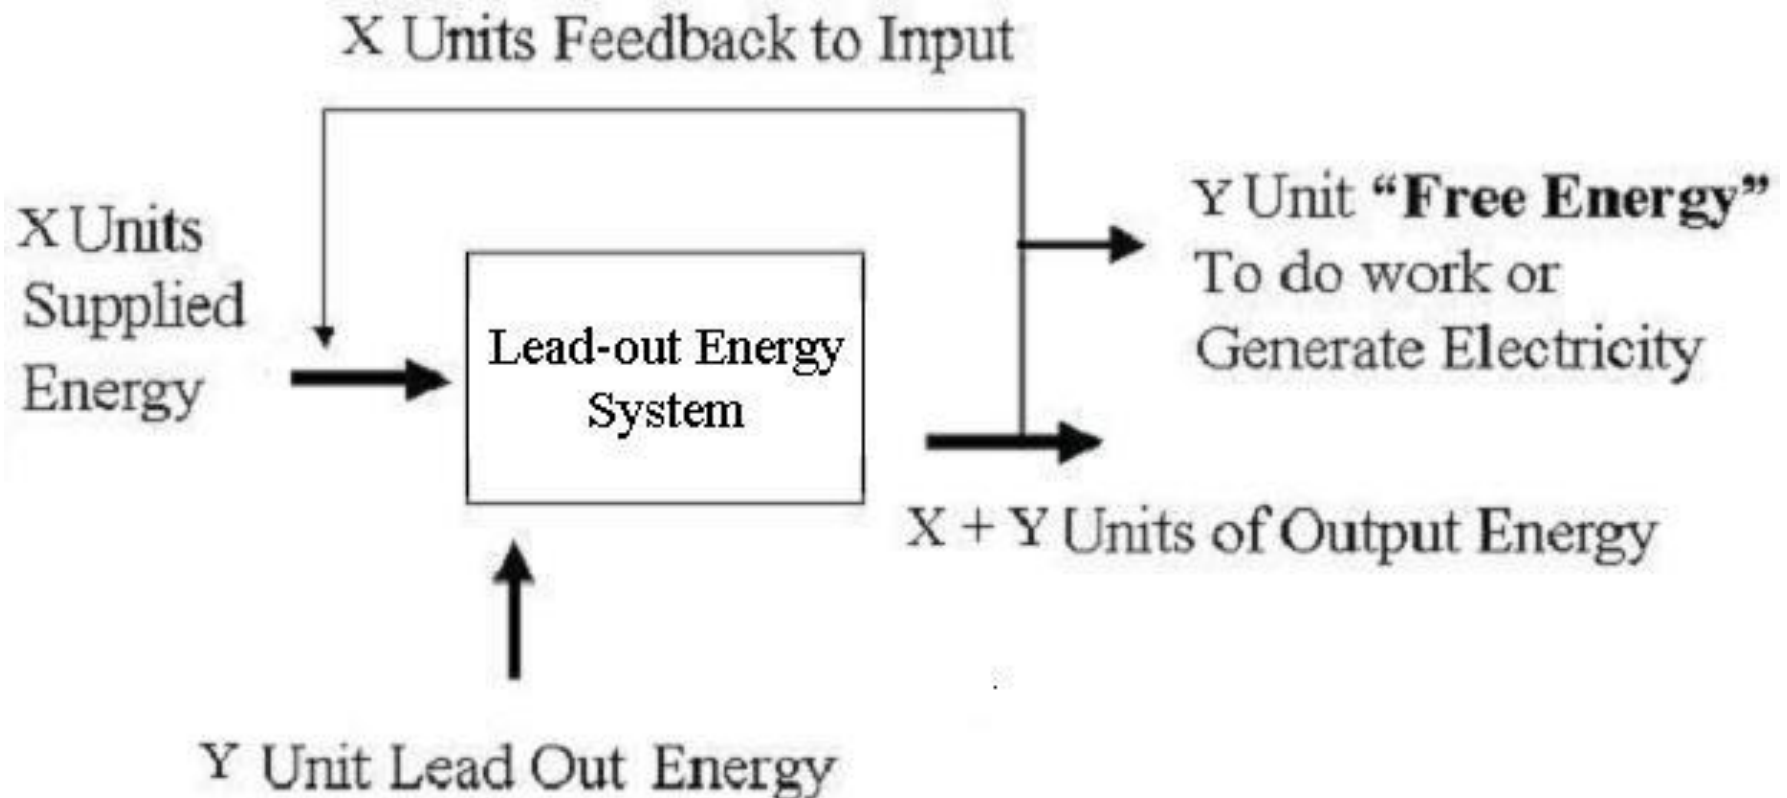

- The Law of Conservation of Energy states that energy cannot be created or destroyed. It can only change from one form to another.
 - Thus perpetual motion machines not possible.
- Lead-out Energy Machines can bring-in energy from the environment and thus possible.
 - Solar Energy, Wind, Tidal Waves (a form of gravitational energy)...

Obstacles to Overcome 2

- Fear that a Rising Power may repeat Colonialization and Conquest.
- Belief in the Bible (Revelation Chapter) that Nuclear Conflict is inevitable.
- Need for every Nation to become the Lowest Cost Producer reducing wages and prosperity to all citizens.
- Reluctance to share high technology.

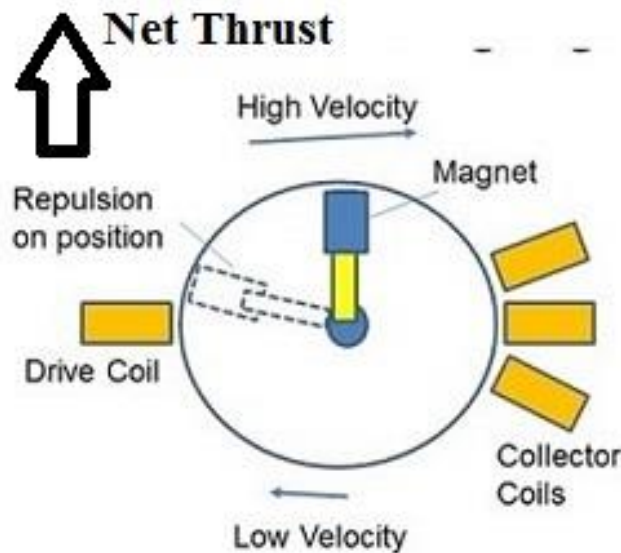

Bring-in Energy from Environment

- **Not Perpetual Motion Machine.**

The Late Mr. Lee Cheung Kin - First person to suggest gravitational energy can be lead-out...

Lee Cheung Kin (Lee-Tseung Theory)

Borrowed design concept
From 225 HP Pulse Motor

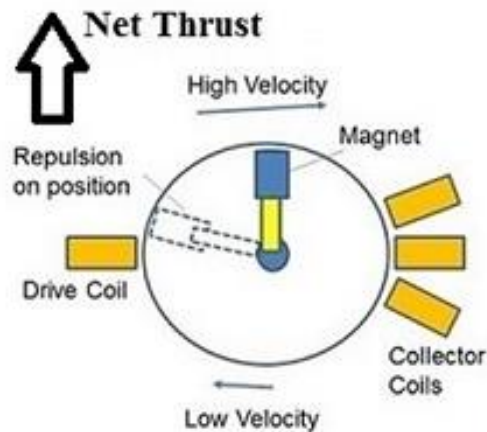

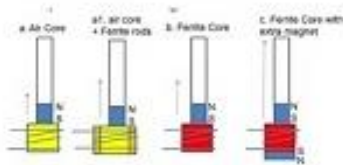

**Use Centrifugal Force
(King David Sling)**

Simple Proof-of-concept experiments. (output energy/input energy) $COP > 1$?

- Conceptual Theory achieved.

1. Pulsed Pendulum can lead-out gravitational energy...

2. UFO propulsion can be achieved via varying angular velocity...

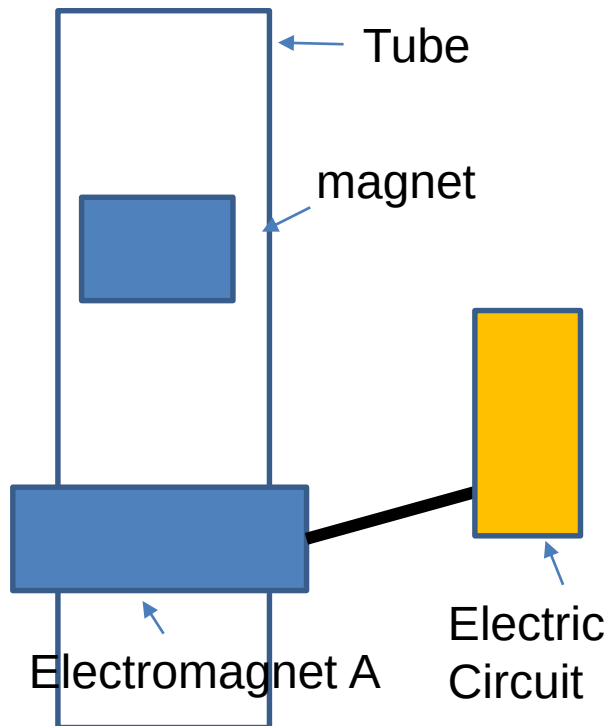

Borrowed design concept
From 225 HP Pulse Motor

**Use Centrifugal Force
(King David Sling)**

Electromagnet Repulsion Experiment

- Output potential energy (mgh) more than Input electrical energy ($V \cdot I \cdot t$)

Output Potential Energy Measurement
Is relatively strict forward.

- Use multiple cylindrical magnets
- Use highest Jump position
- Need to position magnet and coil

Input Electrical Energy Measurements can
be done via Oscilloscope.

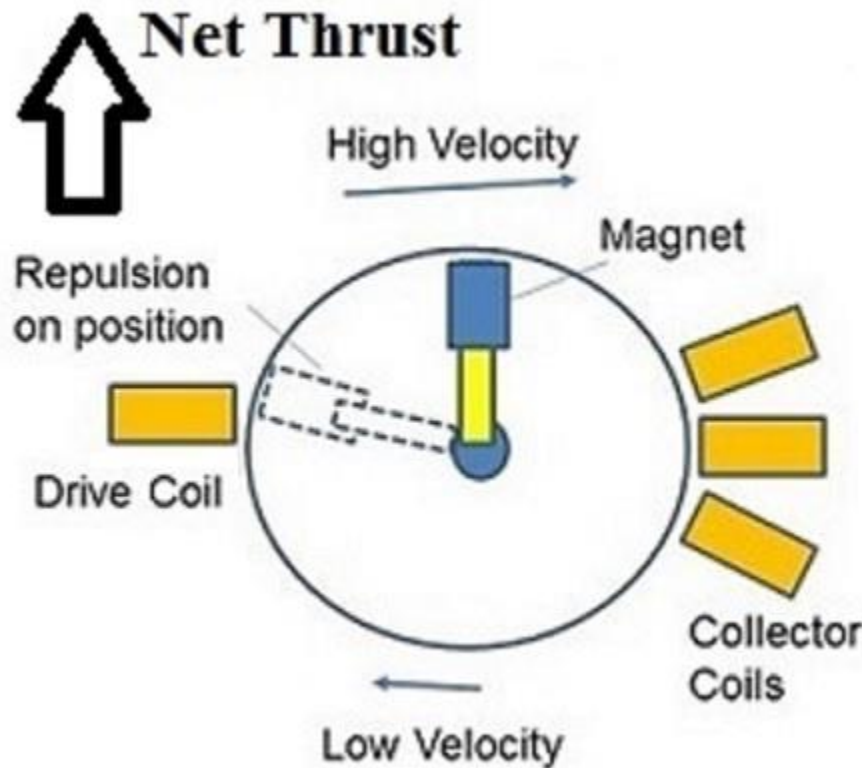

- Voltage across coil gives Voltage V
- Voltage across one ohm resistor gives I
- Waveform displayed and analyzed.
- ***Measurement of Repulsion Time t is currently under discussion.

Possible Experimenter/Replicator

- Bill, Lau and Tseung (done at home)
- Hong Kong University
- Jesse's VC Contacts in Hong Kong and Israel
- Old Hong Kong Inventor Association contacts
- Other Universities in Hong Kong
- Sow Seeds via Internet
- China and USA Military already did such experiments?

The King David Sling Technology

- The David and Goliath Story.

High Angular Velocity
Gives high Centrifugal
Force.

Magnet at top part of
circle has high Angular
Velocity.

Similar invention by ISA
on youtube.
Centrifugal propulsion.

The Circular Motion Experiment

- The Pulse can be turned on at an exact position.
 - Magnet just passed center of stationary coil.
- Pulse duration can be short as repulsion is strongest when magnet and coil close.
- The magnet is slowed down when it approaches the Drive Coil.
- Can place unbalanced wheel on rail...

Man-Made UFO, QMOGENs, etc...

Jesse McQueen US patent

- <https://www.youtube.com/watch?v=XrPkAAfWB8I>
- ***US QMoGen Patent 7,095,126, Aug 2006***
- *The invention involves a generator head, motor, gear box, and belts. "Once the system has started, it is not necessary for the battery to supply power to the system. The battery can then be disconnected. The alternator and electric motor work in combination to generate electrical power."*

> 60 QMOGEN Systems?

- The system is essentially the following:

After starting (A connected to B), gravitational and electromagnetic (Electron Cloud) energy will be brought in by the Unbalanced Wheel (one pulse per revolution). H will be able to power I and B. A can be disconnected.

Tsinghua University QMOGEN

Unbalanced Cylinder => Many Unbalanced Wheels => Many Pendulums
Milkovic 2SO can lead=ou gravitational energy.
Tsinghua QMOGEN can do much better.

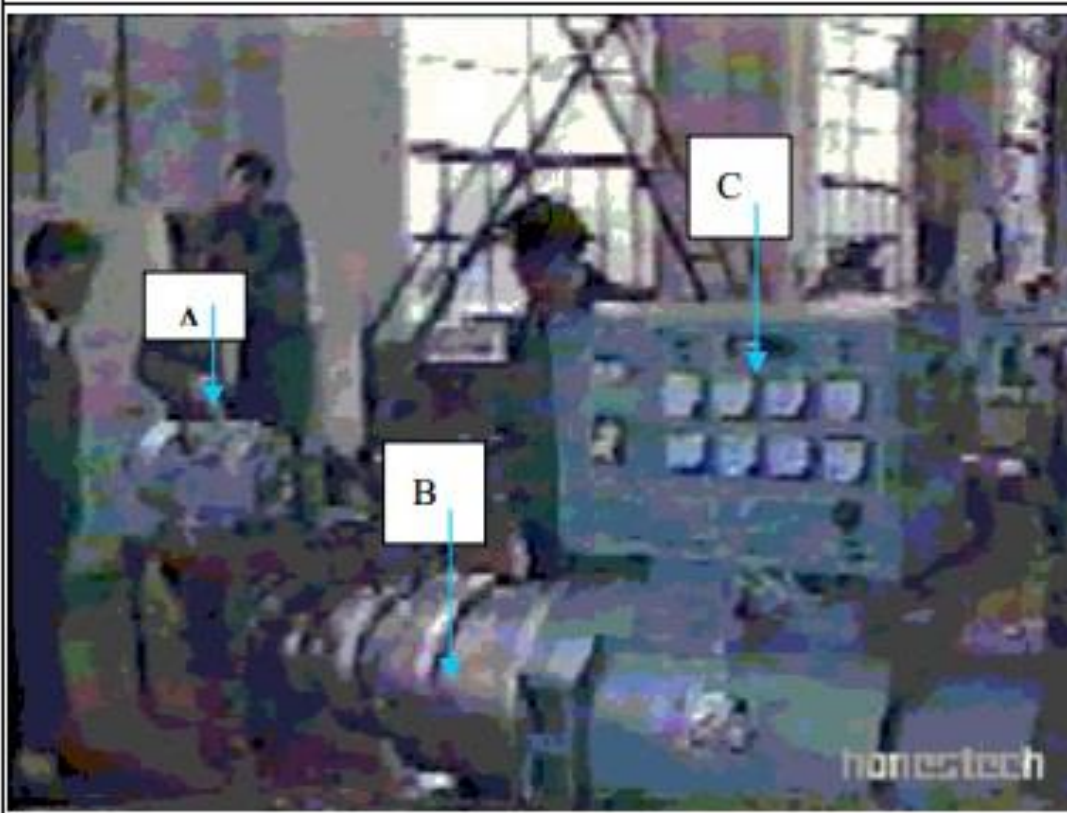

Figure 8.2 The Cylinder Electricity Magnifier that could magnify Input 30 times known to Tsing Hua University, China since 1996.

A = Input AC Motor

B = Magnifier and Output AC Generator

C = Instrument Panel

Tsinghua University
Energy Multiplier

225 HP Pulse Motor from USA funded by **Hong Kong** in 2000 (Military Secret?)

Outer Electromagnets

外磁線圈

內磁石

Inner Rotating
Permanent Magnets

USA inventor did not get investment from USA. Funded by Andrew Wong!
Theory explained by Lee and Tseung at Tsinghua University in 2006.

Magnet and Solenoid Repulsion 1

- Setup overview

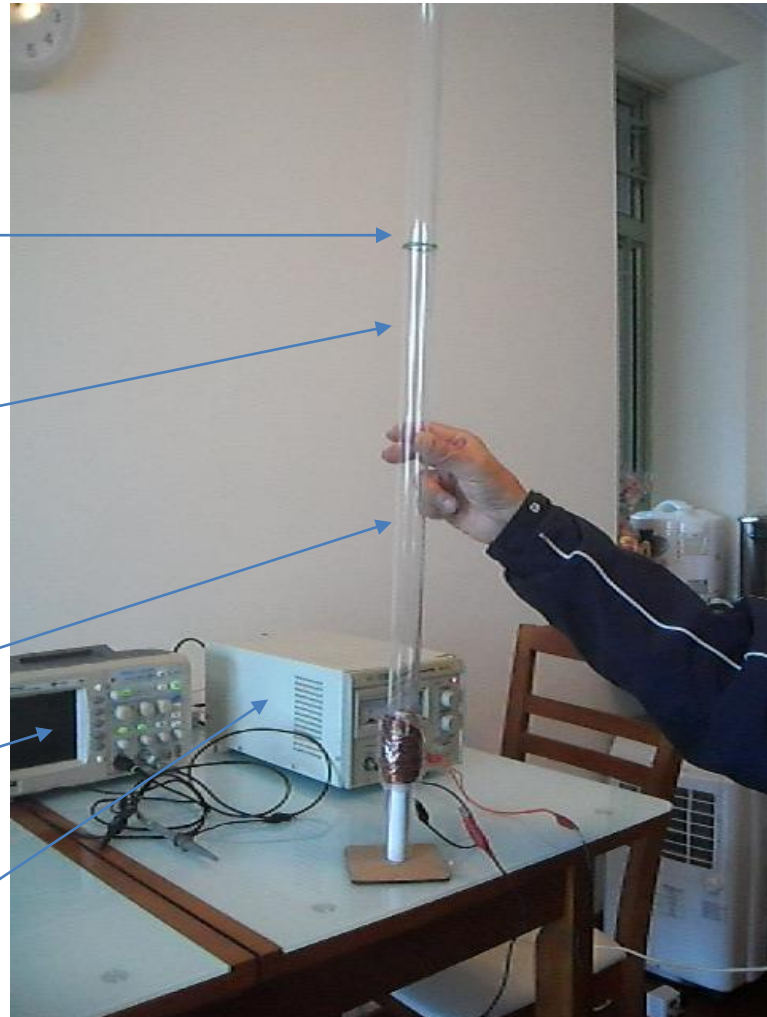

Rubber band to
Show Highest position
(Jumped 49.2cm)

1 meter long
Transparent tube

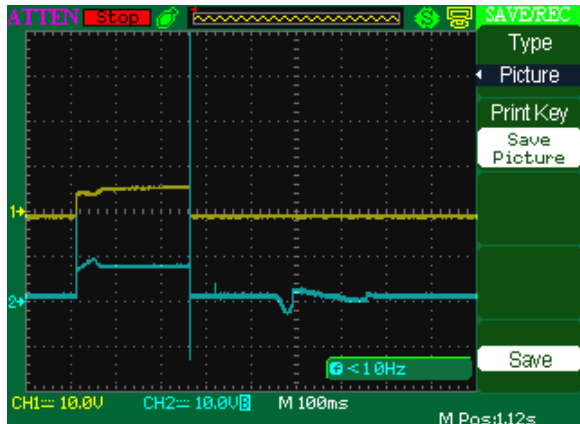

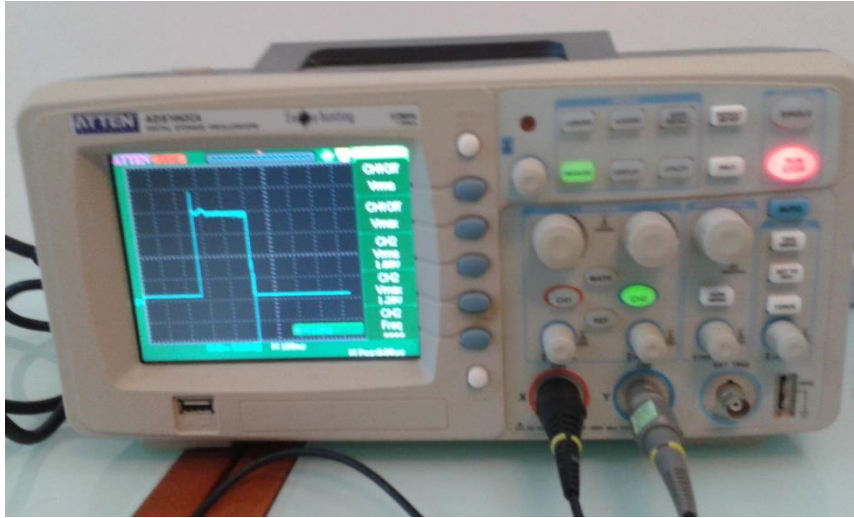

Hand to hold tube
In vertical position

Oscilloscope

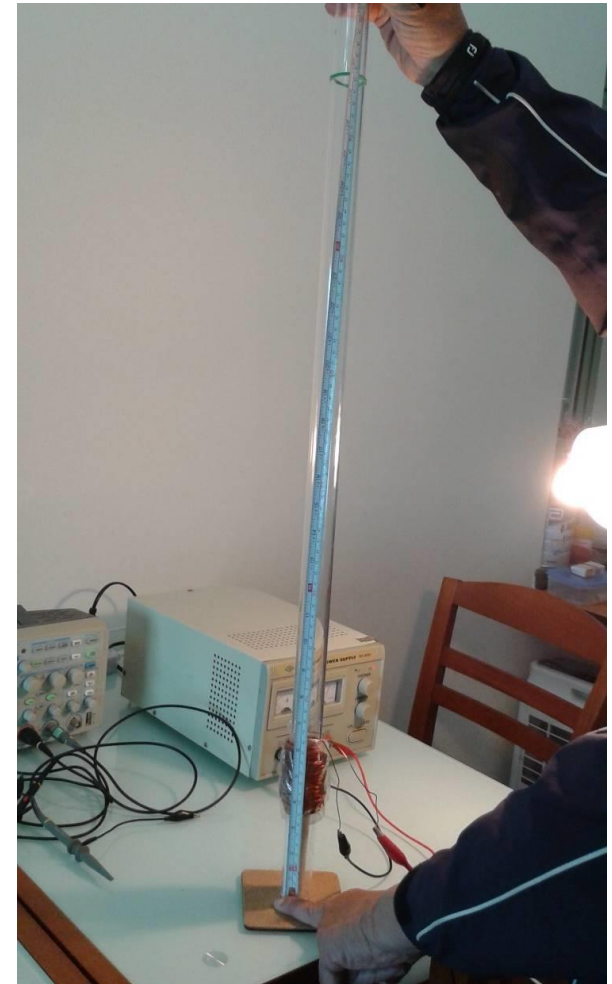

DC Power Supply
Set to 17.5 V

The Proof-of-Concept Experiment

Experimental
Result under
Review.
What should be
The correct
Repulsion time?

The non-technical aspects

- The technology may be developed into weapons systems superior to all existing Planes, Rockets, Missiles etc.
- USA does not want to disclose the technology to undermine its Military Superiority.
- China fears a Preemptive Strike by USA.
- Likely for an unexpected Nation to first announce and demonstrate the technology.

Acceptance of 5 year plan models

- The rapid economic growth of China is evidence and model for Developing Nations.
- Impossible for every Nation to become the Lowest Cost Producer and provide prosperity to its workers.
- New Model may be Mutual Credits, Special Economic Zones and Super Democracy.
- Modern Wealth is the quality and quantity of Meaningful Economic Activities.

Mutual Credits

- Country A gives X amount of its Currency to Country B for Country B to buy its goods and services.
- Country B does the same vice versa.
- No Debt is involved.
- More Advanced Country A has the Currency of Country B. It can invest with cooperation on infrastructures, manufacturing, property etc.

Special Economic Zones (SEZ)

- China was successful with Special Economic Zones with special policies.
- A Country may not want foreigners to own its property or land but if restricted to SEZ?
- The SEZs expected to be developed faster with more foreign investment and participation.
- Developing Countries can learn faster from SEZs within their jurisdiction.

Super Democracy

- Democracy allows one person one vote to elect representatives.
 - If representatives do not perform, vote them out.
 - Peaceful transition of Power.
 - But Party Politics slowed policy decisions.
- Super Democracy
 - With Internet, every voter can express views and vote directly.
 - Key Issues decided by voters (not representatives)

Love Thy Enemies

- In Business and in Politics, there are no permanent friends nor enemies.
- Weapons are no longer fists, arrows, planes.
- Battlefields extended to Cities and Cyber Networks.
- Nuclear Weapons destroy all. UFOs are new delivery systems. No winners and all losers.
- Remove hate. Seek International Brotherhood.

Meaningful Economic Activities (MEA)

- What is MEA for one Country may not be MEA for another.
- Internet allows Input from all interested.
- The Leaders must filter and determine what is MEA for their Nations.
- Possible to implement via 5 year plans?
- Is Research and Development of Lead-out Energy Flying Saucer a MEA for the Nation?

Money as the Incentive

- For the individual, Money still provides much incentive.
- Family businesses cannot compete with Multinationals?
- Multinationals cannot compete with State Enterprises?
- Governments can increase money supply and direct to appropriate sectors of society?

Super Silicon Valley Mentality

1. Everything is third class, turn it to second or first class. Strive for the very best.
2. Either the problem cracks or we crack. Nothing is too difficult.
3. We are Gods. We make and change rules.
4. We teach the World via our failures.
5. We have the Internet to learn anything by tomorrow.

Summary 1

- Gravitational, Magnetic, Electromagnetic, Electron Cloud Energy can be lead-out or brought-in.
- Flying Saucers can use Centrifugal Force (King David Sling Technology)
- China and USA treat this as “top secret”?
Some UFOs are man-made?
- HKU to provide **scientific verification**?
- Knowledge to be shared to benefit the World.

Summary 2

- The technology potentially can wipe out all existing war planes, rockets, missiles...
- Must preach Love Thy Enemy.
 - Germany and Japan not treated as enemies after Second World War.
- Must look for win-win solutions
 - Mutual Credits, Special Economic Zones, Super Democracy, Love Thy Enemies
 - International Brotherhood. World as One.
